ABOUT BIACal TBI SPECIALIST CERTIFICATION

BIACal Certified TBI Specialist (BCTBIS) is a credential for professionals who assist persons with TBI in a legal, medical, or rehabilitative capacity. BCTBIS is the next step in professional development and is widely recognized and respected in the Traumatic Brain Injury (TBI) space. By becoming BCTBIS certified you will be counted among the most prestigious group of TBI professionals in the nation. In addition to being held in high esteem within your field, you will enjoy the perk of having preferred speaker consideration at BIACal events, conferences, and webinars which attract thousands of TBI survivors, their families, and fellow professionals.

OUR MISSION

To create a network of screened and vetted TBI specialists and position them to serve TBI survivors.

OUR VISION

To bring visibility and recognition to the best TBI specialists.

UNIQUELY POSITIONED TO VET TBI PHYSICIANS, ATTORNEYS, AND VENDORS

BIACal is the authority on TBI in the state of California and works closely with the best TBI physicians, attorneys, and vendors. We are uniquely positioned to perform the due diligence necessary to properly and thoroughly vet TBI professionals.

IN THE BEST INTEREST OF TBI SURVIVORS

The TBI space, unfortunately, consists of many physicians, attorneys, and vendors that do not have the best interest of the survivor in mind. This fact has inspired BIACal to create the TBI Specialist Certification Program in an effort to protect individuals effected by TBI from physicians, attorneys, and vendors that do not put their best interest before anything else.

THE APPLICATION PROCESS

To apply for BCTBIS certification, you must be a licensed and practicing professional in the TBI space and have been practicing for a minimum of five years. After completing an application, our Board of Governors will review your credentials and arrange for an interview if you qualify. Upon completion of the interview, the board will vet your credentials, perform a background check, and make a decision based on its findings. This process can take up to thirty days. All information provided as part of the application process will be protected and held on our private, secure servers. If you are awarded the certification you will receive an official displayable certificate and your name will be listed on our website.

BOARD OF GOVERNORS

Our esteemed Board of Governors is comprised of the best of the best in the TBI space and under their leadership our organization is well-positioned to expertly authenticate TBI professionals and place them on the frontlines of our mission to help TBI survivors.

Dr. Rod Amiri, M.D.

Dr. Rod Amiri, M.D. is a board-certified psychiatrist and diplomate of the American Board of Psychiatry and Neurology as well as the American Board of Addiction Medicine. Based in Los Angeles, California, Dr. Amiri is also an injury specialist (CBIS) certified by the Brain Injury Association of America. Committed to the ever-evolving and growing understanding of the psychological and psychiatric impacts of TBI, his concentration on the psychological symptoms of brain injury and disease gives him a unique perspective when it comes to treating the mental health side effects of TBI.

Dr. Fardad Mobin, M.D.

Dr. Fardad Mobin, M.D. is a highly-skilled, board-certified neurosurgeon. He has performed over 2,000 surgeries and is recognized for his exceptional operative skills as well as his excellent patient care. Dr. Mobin is a graduate of the Rensselaer Polytechnic Institute in Troy, New York, holds a medical degree from the University of California Davis School of Medicine, and has completed a fellowship at the University of California, Los Angeles.

Dr. Rami Hashish M.D.

Dr. Rami Hashish is the Founder of the National Biomechanics Institute and the Chief Technological Officer of pareIT. He has been retained as an expert witness on more than 1,000 occasions, examining injuries in sports, the workplace, motor vehicle, and aviation accidents. Dr. Rami has consulted for various organizations and agencies, including the U.S. Airforce, the National Brain Injury Association, as well as teams and agents affiliated with the NBA and NFL.

CODE OF ETHICS

This code is intended to serve as a guide to the everyday conduct of BIACal Certified TBI Specialist. It represents standards of ethical behavior in professional relationships with people receiving TBI services, with colleagues, with employers and employees, with other individuals and professionals, and with the community and society as a whole. This code is based on the fundamental values and principles of the TBI field and profession: these include respecting the worth, dignity and uniqueness of all persons as well as their rights and opportunities and obligations within a safe, caring, environment. It honors the need for BIACal Certified TBI Specialist to keep the person's wants and needs primary in service delivery, to advocate for individual rights and interests, and to oppose discrimination in services and in the community. It also recognizes that specialists treat people as people first. The helping relationship is foremost in providing services. The philosophy of TBI rehabilitation fosters and promotes these values. This code offers general principles to guide conduct in situations that have ethical implications. It provides the basis for making decisions about actions to take. BIACal Certified TBI Specialist are expected to take into consideration all the principles in this code that have a bearing upon any situation in which professional intervention and ethical judgment are required. Frequently, the particular situation determines the ethical principles that apply and the manner of their application. The specialist should consider not only the particular ethical principles, but also the entire code and its spirit. Specific applications of ethical principles must be judged within the context in which they are being applied.

MAJOR ETHICAL PRINCIPLES

The following principles should guide certified brain injury specialists in their various professional roles, relationships and levels of responsibility.

- + Specialists maintain high standards of personal conduct in their role as a BIACal Certified TBI Specialist.
- + Specialists strive to be proficient in TBI services.
- + Specialists regard as primary the obligation to help individuals achieve their needs and self-determined goals.
- + Specialists promote multicultural competence in all places and relationships in the practice of TBI services.
- + Specialists promote and participate in full discussion of potential ethical dilemmas and decision-making.
- + The primary responsibility of specialists is to persons receiving TBI services.
- + Specialists refrain from entering into dual relationships with persons receiving their services.
- + Specialists act with integrity in their relationships with colleagues, families, significant others, other organizations, agencies, institutions, referral sources, and other professions in order to maximize benefits for persons receiving services.
- + Specialists make every effort to support the maximum self-determination of each person served.
- + Specialists respect the privacy of persons receiving services and hold in confidence all information obtained in the course of professional service.
